- Postman (API Request Tool)
- Jira (Project Management Tool)
- Sentry (Error Tracking Platform)
- Jasmine (Unit Test Framework)
- Sendgrid (Email Delivery Platform)

EXPERIENCE

SOFTWARE DEVELOPER

MY E.G. Services Berhad (MYEG)

2022 Mar - Present

- **Blockchain Technology Implementation:** Delivered secure transaction processing for MYDC Wallet through decentralized blockchain systems, overseeing comprehensive ledger monitoring to ensure efficient transaction management.
- **Frontend Development Expertise:** Designed and implemented user-friendly interface pages for Compare in Angular, notably enhancing features like AI Chat, Referral, and Administration functions to improve user engagement and satisfaction.
- **Payment System Oversight:** Managed all aspects of frontend payment systems for MYDC Wallet, ensuring accurate processing of payments, rebates, refunds, and transaction tabulation, which contributed to a seamless user experience.
- **Full-Stack Development and Mentorship:** Played a key role in both backend and frontend development projects utilizing Laravel and Angular, while actively mentoring new team members to enhance team collaboration and knowledge sharing.
- **Adaptability and Scalability:** Demonstrated versatility by effectively learning and applying new technologies, such as Vue in the Recruitment System, and optimized previous code structure to be robust and flexible components that can adapt to changes.
